Derwent Abstract: (DE10040213A) **Novelty** - The method involves generating profile and assigning it to an application. The functions of the application, are downloaded on the basis of the profile.
Detailed Description - An INDEPENDENT CLAIM is also included for data processor.
Use - For data processor implemented in intranet, LAN, WAN.
Advantage - Increases security of the system, by limiting user's access to functions.

Images:
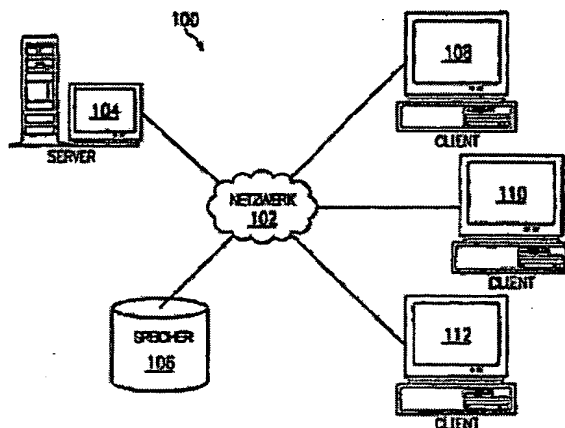

Description of Drawing(s) - The figure shows the graphic representation of distributed data processor.
